### EMERGENCY OVERVIEW

#### **APPEARANCE/ODOR:**

Clear Yellow to Amber Liquid/Mild Oily Odor

#### **SHORT TERM EXPOSURE**

**GENERAL:** No significant adverse health effects are expected to develop with normal use.

**EYES:** Slight to moderate irritant.

**SKIN:** Persons with pre-existing skin disorders may experience slight irritation.

**INHALATION:** Product is moderately toxic through inhalation - Acute toxicity (Rat) 4 hours LC50 1170 mg/m<sup>3</sup>, as aerosol. Persons with pre-existing respiratory disorders may experience slight irritation. Respiratory protection for oil mist is recommended during operations where mists or vapors are generated (e.g., heating). Not expected to be a respiratory sensitizer.

**INGESTION:** No significant adverse health effects are expected to develop if only small amounts (less than a mouthful) are swallowed.

**ASPIRATION INTO LUNGS:** Small amounts of liquid entering the lungs during ingestion or vomiting can cause chemical pneumonitis or pulmonary edema.

**OSHA REGULATED:** Not regulated.

**LISTED CARCINOGEN:** NTP RoC- Not listed. IARC MONOGRAPHS – Not classified.

### **SECTION 4 – FIRST AID MEASURES**

**EYE CONTACT** - In case of eye contact, flush immediately with water for a minimum of 15 minutes; seek medical attention if contact irritation persists.

**SKIN CONTACT** – If contact with skin results in irritation, wash thoroughly with soap and water. If product has been injected or otherwise entered into or under the skin, seek immediate medical attention even in the absence of symptoms.

**INHALATION** - If affected by inhalation, remove to fresh air. Seek medical attention.

**INGESTION** - If swallowed, do not induce vomiting as this may result in aspiration into the lungs; seek immediate medical attention.

### **SECTION 5 – FIRE FIGHTING MEASURES**

**FLASHPOINT:** >300°F

**EXTINGUISHING MEDIA:** Do not use water; use Dry Powder or Carbon Dioxide.

**DECOMPOSITION PRODUCTS:** Fire may generate Carbon Monoxide and Carbon Dioxide.

**LOWER FLAME LIMIT:** ND

**HIGHER FLAME LIMIT:** ND

**UNUSUAL FIRE AND EXPLOSION HAZARDS:** Excessive ambient temperature may cause sealed containers to explode; cool containers with water. Keep unnecessary people away.

## Safety Data Sheet COASTALUBE®

**FIRE FIGHTING EQUIPMENT:** Fire Fighters and others exposed to products of combustion should wear self-contained breathing apparatus. Equipment should be thoroughly decontaminated after use.

### SECTION 6 – ACCIDENTAL RELEASE MEASURES

**CHEMICAL EMERGENCY NUMBER (24 HOURS):** CHEMTREC 1-800-424-9300 USA/CANADA

**SPILL:** In case of spill, if product cannot be collected by liquids vacuum and recycled, absorb with inert material and dispose of in accordance with applicable regulations. Product as sold would be a nonhazardous industrial waste. Avoid spillage into drains, surface, and ground water. Discharges or spills into or leading to surface waters that cause a sheen must be reported to the National Response Center, (800) 424-8802.

**RCRA STATUS:** As sold, product is not a Characteristic or Listed RCRA hazardous waste.

### SECTION 7 – HANDLING AND STORAGE

Handle in accordance with good industrial hygiene and safety practices. These practices include avoiding unnecessary exposure and prompt removal of material from eyes, skin and clothing. Good housekeeping is essential in reducing possible slipping hazards.

**HANDLING AND STORAGE:** Product can accumulate static charges which may act as an ignition source. Store away from oxidizers. Provide sufficient general ventilation during and after application. Avoid prolonged or repeated contact with skin, eyes and clothing. After handling this product, wash hands before eating, drinking or smoking. If necessary, take first aid action shown in Section 4.

### SECTION 8 – EXPOSURE CONTROL/PERSONAL PROTECTION

#### GENERAL CONSIDERATIONS:

Consider the potential hazards of this material (see section 3), applicable exposure limits, job activities, and other substances in the work place when designing engineering controls and selecting protective equipment.

**EYE PROTECTION:** Safety glasses with side shields are recommended as minimum protection. Chemical goggles or faceshield combined with safety glasses should be worn during transfer operations or when there is a likelihood of misting, splashing or spraying of this material.

**RESPIRATORY PROTECTION:** Not normally needed. Use NIOSH-approved respirator for organic vapors if exposure is unknown or exceeds any permissible limits. A particulate air-purifying respirator approved for dust/oil mist is also appropriate.

**PROTECTIVE GLOVES:** Wear protective gloves (suggested are PVC, neoprene, nitrile rubber) if irritating to skin.

**VENTILATION:** General or Local exhaust.

**LOCAL EXHAUST:** Recommended in circumstances where general ventilation is limited, personal exposure is above recommended limits, or where respiratory irritation occurs.

**Use NIOSH/MSHA approved respiratory protection equipment when airborne exposure limits are exceeded (see below). Consult the respirator manufacturer to determine appropriate type of equipment for a given application. Observe respirator use limitations specified by NIOSH/MSHA or the manufacturer. Respiratory protection programs must comply with 29 CFR 1910.134.**

## Safety Data Sheet COASTALUBE®

**VENTILATION NOTES:** Provide general or local ventilation to control exposure levels below airborne exposure limits (see below). The use of local mechanical exhaust ventilation is preferred at sources of air contamination such as open process equipment. Consult NFPA Standard 91 for design of exhaust systems.

**THRESHOLD LIMIT VALUE:** None established for this Product.

**PROTECTIVE EQUIPMENT: HMIS PERSONAL PROTECTION:** C: Safety Glasses, Gloves, Protective Apron

The user should read and understand all instructions and limitations supplied with the equipment since protection is usually provided for a limited time or under certain circumstances.
